Household Environmental Monitoring

Evan Orenstein
Scott Melenbrink
Chris McKiernan

Final Demo

- Demonstrate ability to easily access and view current sensor data through web app

- Integrate weather data queried from internet into system

- Temporarily implement full sensor network in household

    - Record data over 1 week

    - Long and short term storage

- Demonstrate ability to model data

    - Show trends over week in household

   - Make conclusions on data findings

Sensor Network

- Full 6 node network for the last ~12 hours
- TelosB troubleshooting
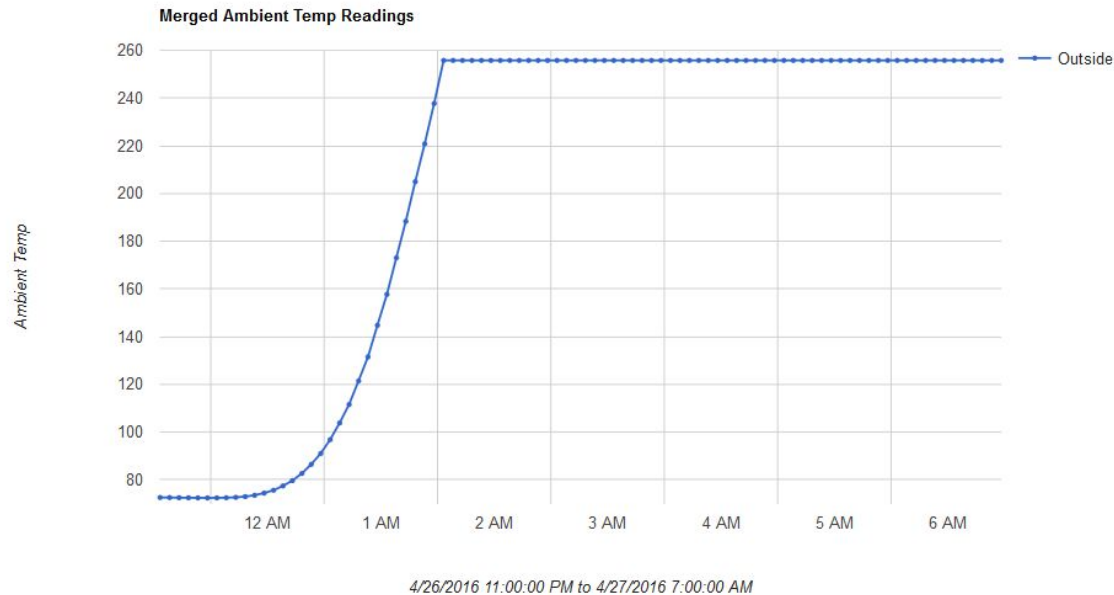

Power Issues
